DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The invention is directed to a method and printing apparatus which can also read/write data to memory tags on or in the paper or other base medium being printed onto. Claims 1, 11 and 12 identify the uniquely distinct features of wherein "at least a part of the memory tag write device required for communication with the memory tag is moveable relative to the base medium back and forth along a second axis substantially perpendicular to the first axis" (claim 1) (claims 11-12 recite similar limitations). The closest prior art, Austin et al., US 6,645,327 and Hohberger et al., US 6,857,714 teach writing data to a memory tag; having a print head for printing onto the base medium; a memory tag write device for data writing to the memory tag on or in the base medium. Either singularly or in combination with other cited references fails to anticipate or render the above underlined limitations obvious.

The prior art applications Austin and Hohberger disclose wherein the base medium is moved along a first axis through or past the apparatus but does not explicitly mention that at least a part of the memory tag write device required for communication with the memory tag is moveable relative to the base medium back and forth along a second axis substantially perpendicular to the first axis.

The meaning of the sentence "at least a part of the memory tag write device required for communication with the memory tag is moveable relative to the base medium back

and forth along a second axis substantially perpendicular to the first axis" is defined in applicant's specification and figures.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
